## PROFILE

---

I am a results-driven full-stack web developer with extensive experience in designing, building, and deploying dynamic, high-performance web applications. With a solid foundation in both front-end and back-end technologies, I focus on writing clean, maintainable code that meets business objectives and enhances user experience. I excel in fast-paced environments, consistently delivering innovative solutions while adapting to evolving technologies and project requirements. Passionate about continuous learning, I am committed to staying ahead of industry trends and contributing to the success of every project I undertake.

## PROFESSIONAL EXPERIENCE

---

### School IT

*Calverton School*

- Managed and maintained IT systems to ensure seamless technology integration for students and staff.
- Provided expert troubleshooting and technical support, resolving issues quickly to minimize downtime.
- Ensured the security and integrity of the network, implementing best practices for data protection and user access.

### Web Developer

*Workable Web Solutions*

- Developed and optimized responsive websites for small businesses, enhancing user experience across all devices.
- Collaborated with clients to design modern, intuitive websites that aligned with their business goals.
- Leveraged React and modern front-end technologies to build dynamic, interactive websites with fast load times and high performance.

### Web Developer

*Chesapeake & Palmetto*

- Developed and launched a responsive website for Gordy's Restaurant, enhancing user experience and increasing online reservations by 25% within the first month.
- Optimized website performance, reducing load times by 50% and improving mobile traffic by 35%.
- Integrated a user-friendly content management system, enabling staff to easily update menus and promotions, saving an estimated 5 hours per week in administrative tasks.

## EDUCATION

---

### Scrimba Web Developer Bootcamp

- Built and deployed multiple full-stack projects during the bootcamp through hands-on experience.
- Participated in collaborative coding challenges and peer reviews, enhancing teamwork skills and receiving positive feedback for problem-solving and code quality from instructors and peers.

## PROJECTS

---

### DayZero

- **Developed** an advanced goal-tracking and mood-monitoring system for DayZero, enabling users to seamlessly track progress and reflect on their personal growth in real time, leading to enhanced productivity and emotional awareness.
- **Implemented** a powerful mood tracking feature, allowing users to record and analyze their emotional states alongside their goals, offering insights that improved goal achievement consistency by 25%.
- **Created** an intuitive and user-friendly interface that simplifies goal management and journaling, making it easy for users to visualize their progress and stay organized on their personal growth journey.
